LICENSED BY SEGA ENTERPRISES, LTD.  
FOR PLAY ON THE SEGA SATURN™ SYSTEM.

T-7901H

## **WARNING: READ BEFORE USING YOUR SEGA SATURN**

A very small percentage of individuals may experience epileptic seizures when exposed to certain light patterns of flashing lights. Exposure to certain patterns or backgrounds on a television screen or while playing video games may induce an epileptic seizure in these individuals. Certain conditions may induce undetected epileptic symptoms even in persons who have no history of prior seizures or epilepsy. If you, or anyone in your family, has an epileptic condition, consult your physician prior to playing. If you experience any of the following symptoms while playing a video game — dizziness, altered vision, eye or muscle twitches, disorientation, loss of awareness, any involuntary movement or convulsions — IMMEDIATELY discontinue use and consult your physician before resuming play.

## **PROJECTION TELEVISION WARNING**

Still pictures or images may cause permanent picture-tube damage or mark the phosphor of the CRT. Avoid repeated or extended use of video games on large-screen projection televisions.

## **SEGA SATURN VIDEO GAME USE**

This CD-ROM can only be used with the Sega Saturn. Do not attempt to play this CD-ROM on any other CD player; doing so may damage the headphones and speakers.

This game is licensed by Sega for home play on the Sega Saturn only. Unauthorized copying, reproduction, rental, public performance or broadcast of this game is a violation of applicable laws.

The characters and events portrayed in this game are purely fictional. Any similarity to other persons, living or dead, is purely coincidental.

## **HANDLING YOUR COMPACT DISC**

- The compact disc is intended for use exclusively on the Sega Saturn.
- Avoid bending the disc. Do not touch, smudge or scratch its surface.
- Do not leave the disc in direct sunlight or near a radiator or other source of heat.
- Always store the disc in its protective case.

This official seal is your assurance that this product meets the highest quality standards of SEGA™. Buy games and accessories with this seal to be sure that they are compatible with the SEGA™ SATURN™ System.

# SHELLSHOCK

## STARTING UP

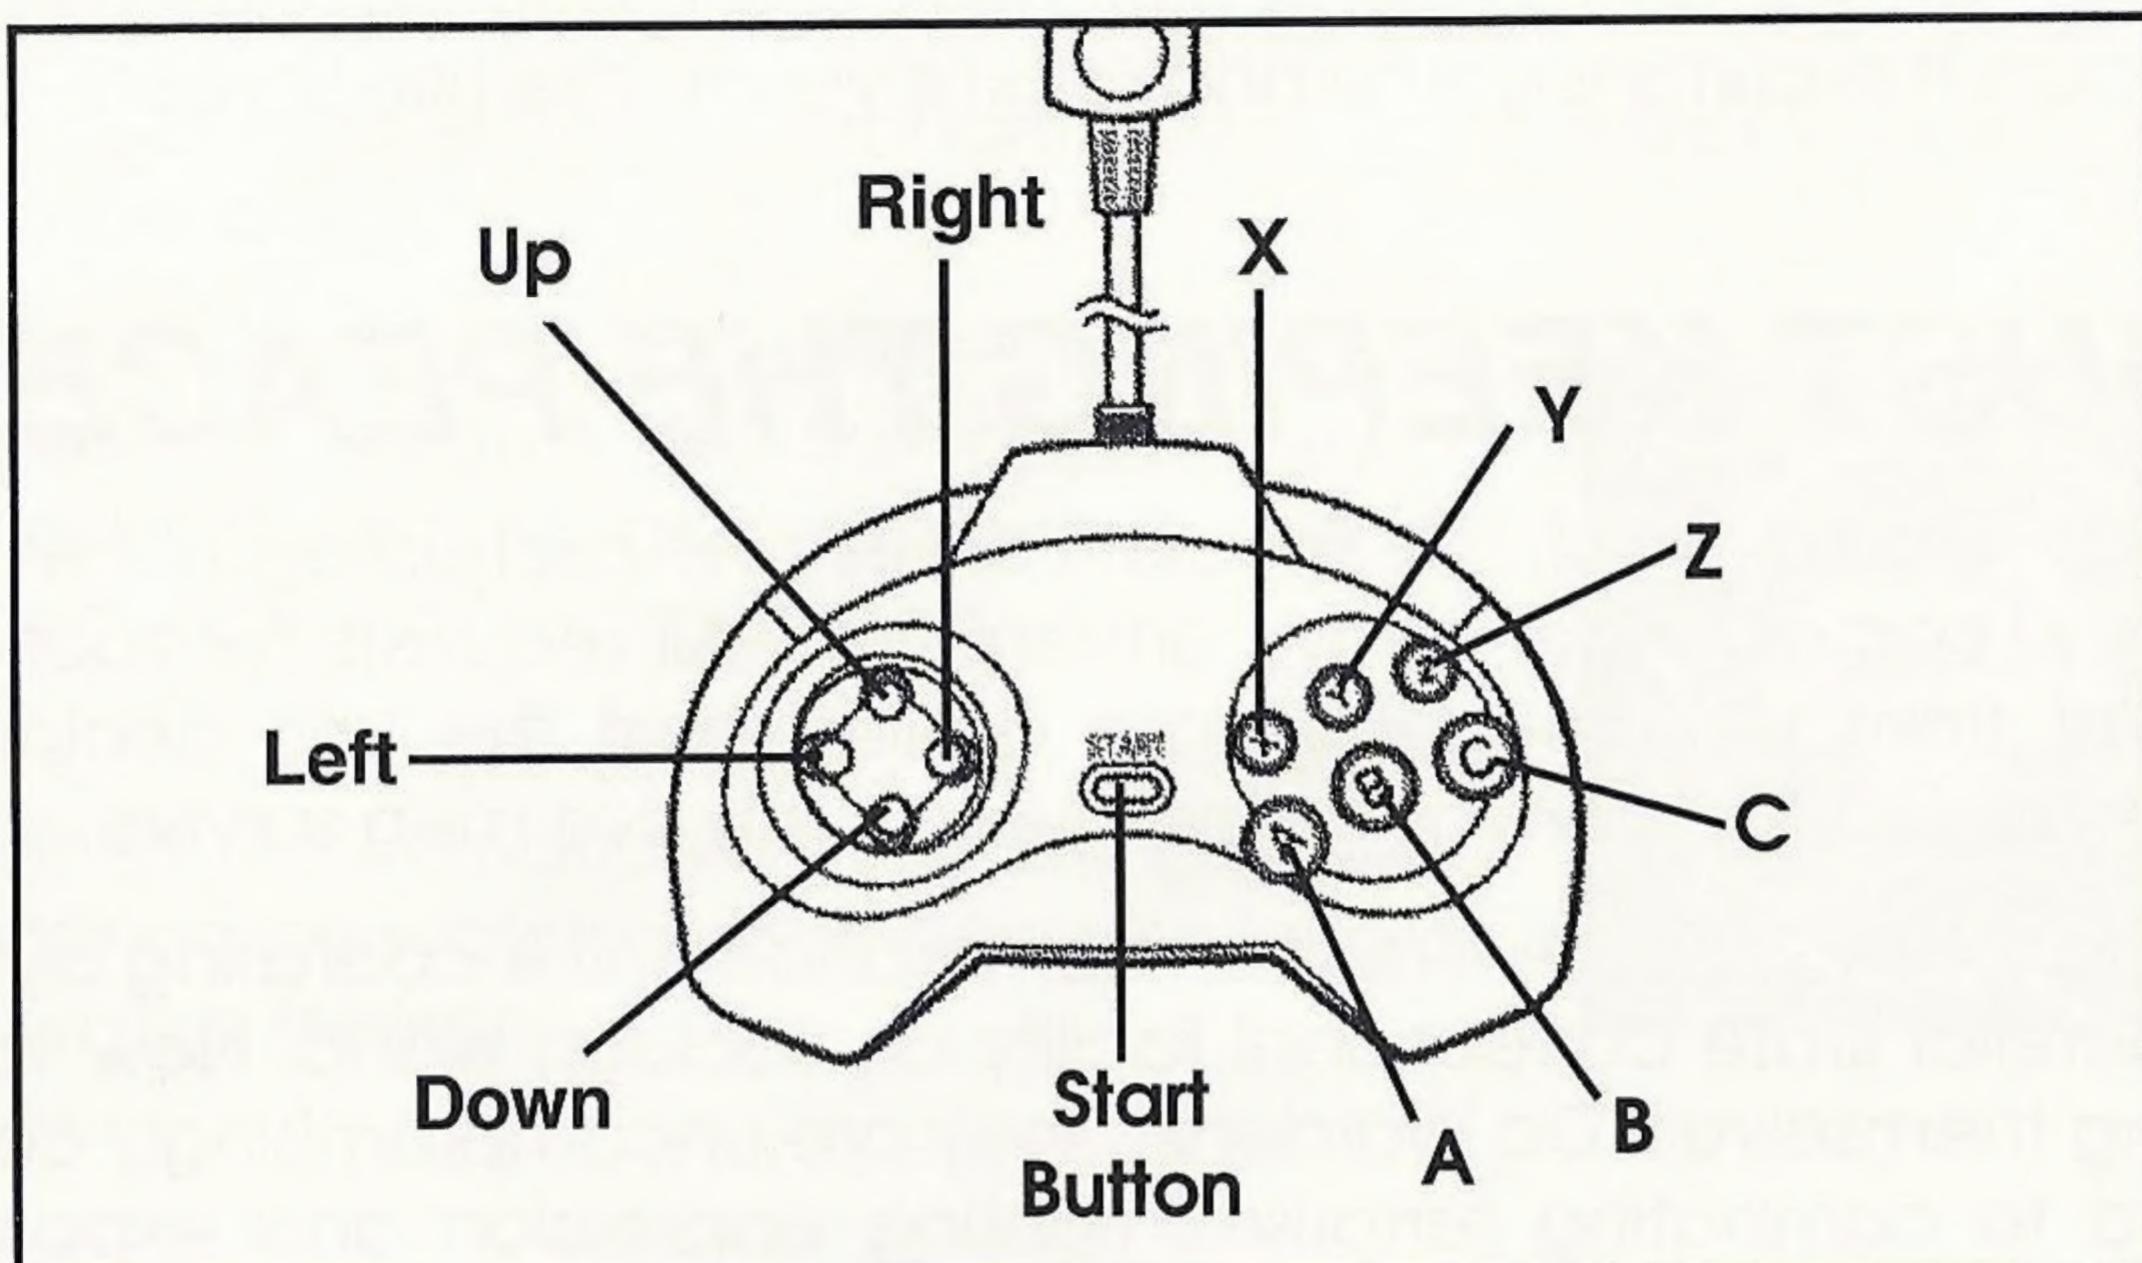

1. Set up your Sega Saturn system as described in its instruction manual. Plug in Control Pad 1.
2. Place the Shellshock disc, label side up, in the well of the CD tray and close the lid.
3. Turn on the TV or monitor and the Sega Saturn™. The Sega Saturn™ logo appears on screen. (If nothing happens, turn the system off and make sure it is set up correctly before turning it on again.)
4. If you wish to stop the game in progress or the game ends, press the Reset Button on the Sega Saturn console to display the on-screen Control Panel.

**Important:** Your Sega Saturn™ CD contains a security code that allows the disc to be read. Be sure to keep the disc clean and handle it carefully. If your Sega Saturn™ system has trouble reading the disc, remove the disc and wipe it carefully, starting from the center of the disc and wiping straight out toward the edge.

## CONTROLS

<b>D-Pad Up</b>	Forward Drive
<b>D-Pad Down</b>	Reverse Drive
<b>D-Pad Right</b>	Steer Right
<b>D-Pad Left</b>	Steer Left
<b>D-Pad Right+C</b>	Handbrake Turn Right
<b>D-Pad Left+C</b>	Handbrake Turn Left
<b>Right Paddle</b>	Moves Turret Right
<b>Left Paddle</b>	Moves Turret Left
<b>Tap both Paddles together</b>	Re-centers Turret
<b>A</b>	Fire currently selected weapon
<b>B</b>	Toggles through available weapons
<b>Z</b>	Selects alternative target
<b>X</b>	Toggles to and from Tactical Map
<b>Y</b>	Zooms in and out of your position while displaying Tactical Map
<b>Start</b>	Pauses / Unpauses the game, and brings up Options Screen

**NOTE:** These are the defaults. Controls can be configured by the user.

# **SHELLSHOCK**

## **QUITTING THE GAME**

Pressing the Start Button along with the A, B, & C buttons during game play quits the current game and returns you to the Title Screen.

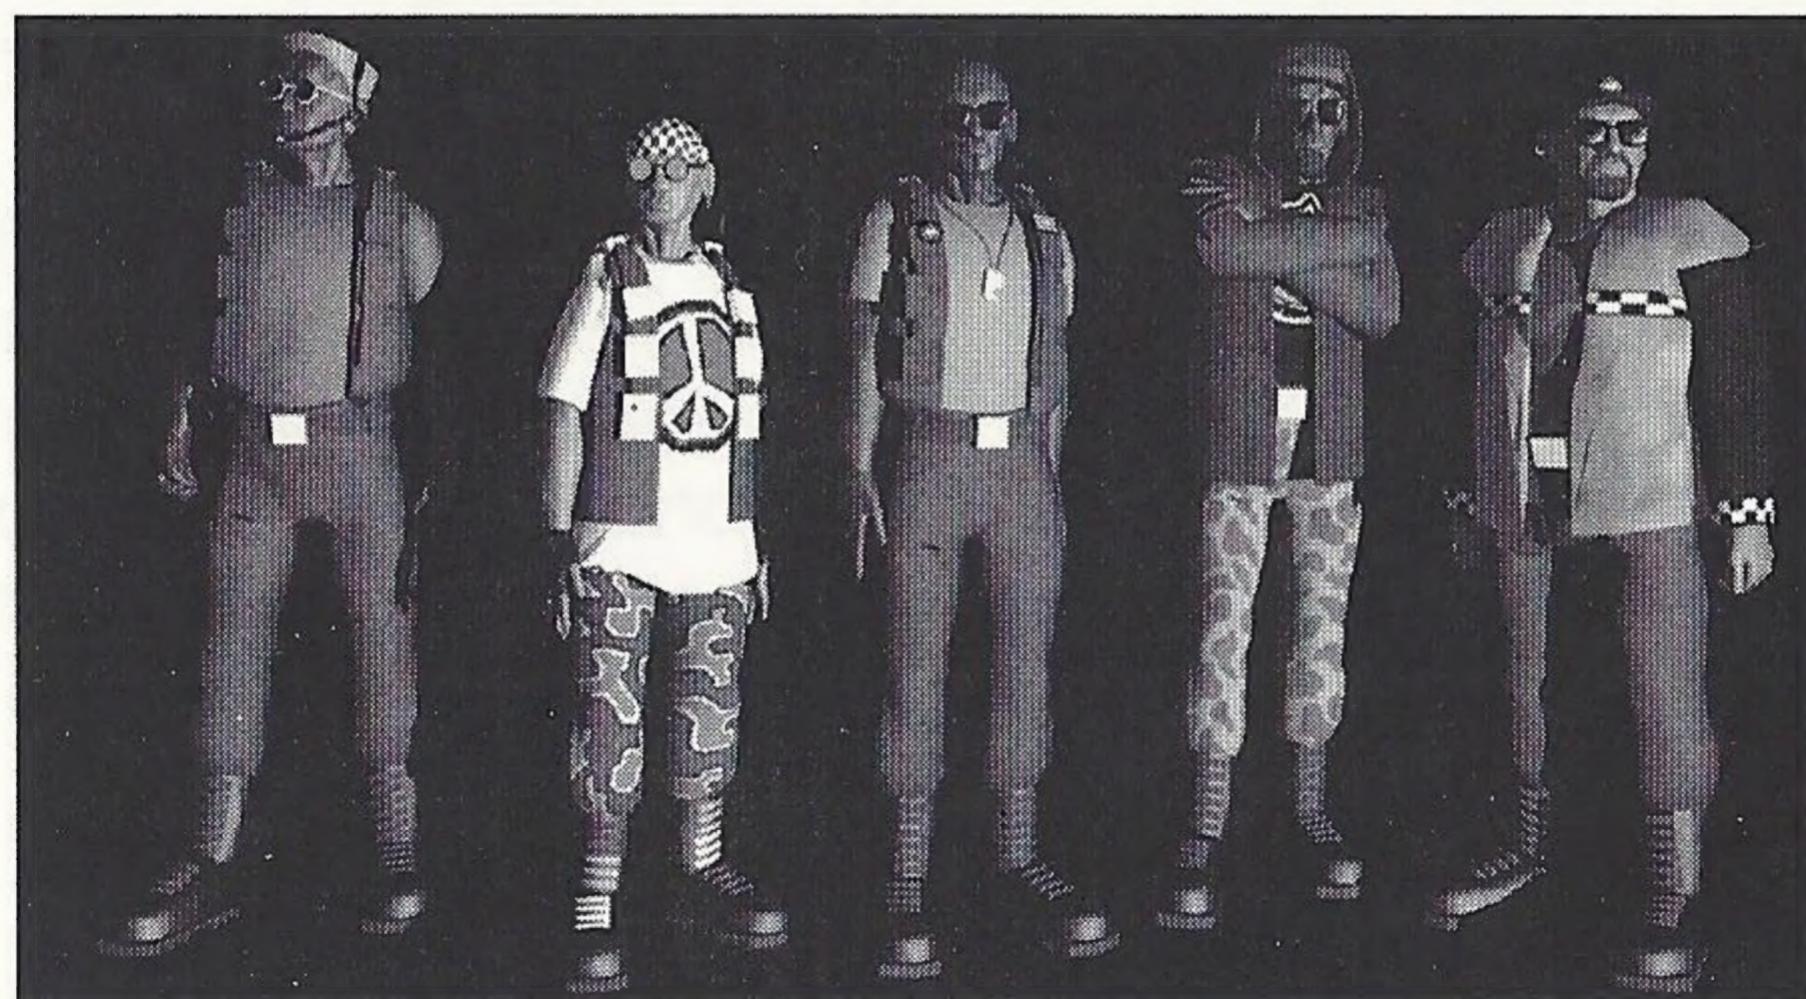

## **JUST KEEPING THE PEACE**

Mostvia Vatska, 1994. A Special Forces unit protecting a civilian convoy, comes under heavy artillery fire. All requests for tactical support from US Intelligence are denied and the unit declared expendable. The convoy is destroyed. Only five men survive.

New York City, 1997. A five-man commando unit is operating out of the derelict state correctional facility on Jackson Island, New York. Calling themselves 'Da Wardenz', they are uncompromisingly committed to combating terrorism, fighting oppression and exposing corruption worldwide.

In a world without justice, they're the last line of defense.

## **THIS IS THE PITCH**

A note from Dogg Tag:

SHELLSHOCK puts you right smack in the middle of the action. You are now a rookie member of the baddest commando tank force you'll ever meet—Da Wardenz.

The object of the game is to serve a tour of duty with these five guys, proving yourself, in their and your own eyes, as you battle your way through a series of missions in a variety of fictionalized, real-world

locations. From the freezing forests of Mostvia Vatska, to the steaming Paranaguan jungle, you're gonna have a real tough time of it.

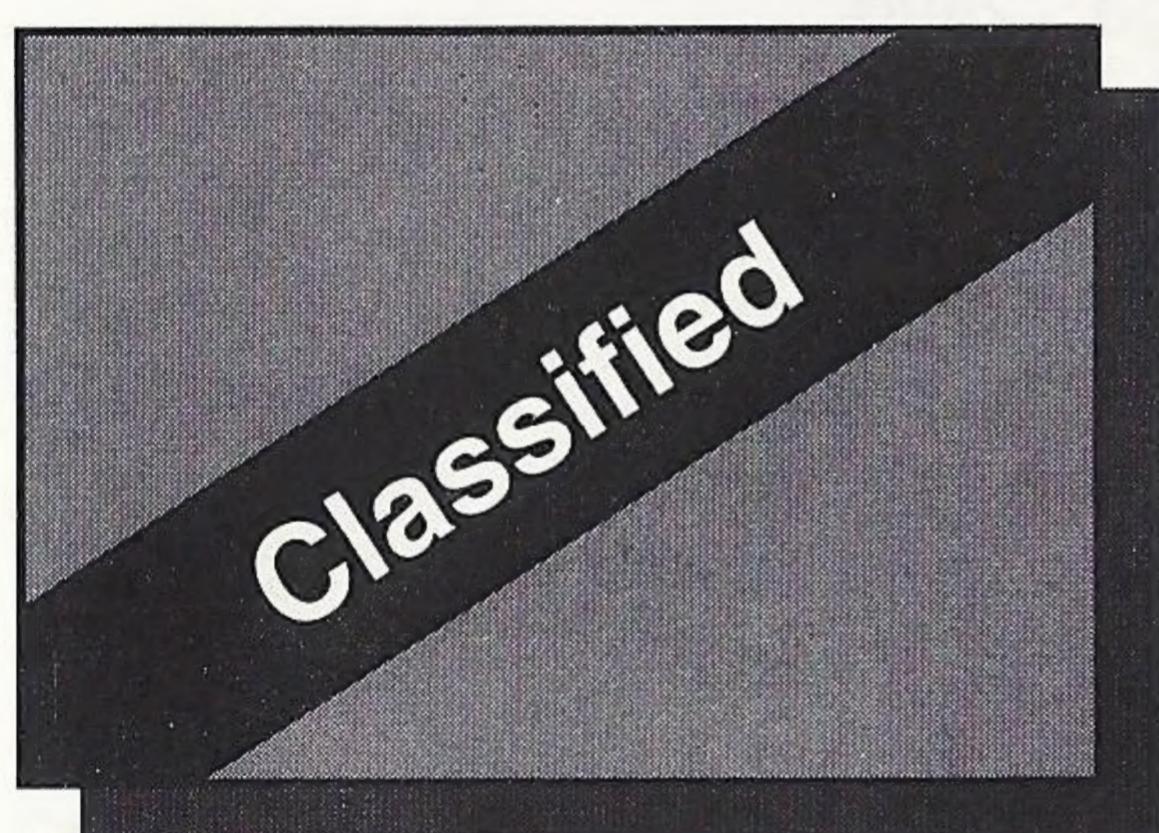

Armed only with an M-13 Predator battletank and several thousand pounds of heavy-duty ordnance, you're gonna find your skills tested to the absolute max.

As the tour of duty progresses—and if you're still breathin'—you'll get the opportunity to upgrade your tank and improve its performance, armor and armaments.

But before we get down to the business at hand, let me introduce to you the guys who are gonna be watchin' your back (so long as you watch theirs):

## DA WARDENZ

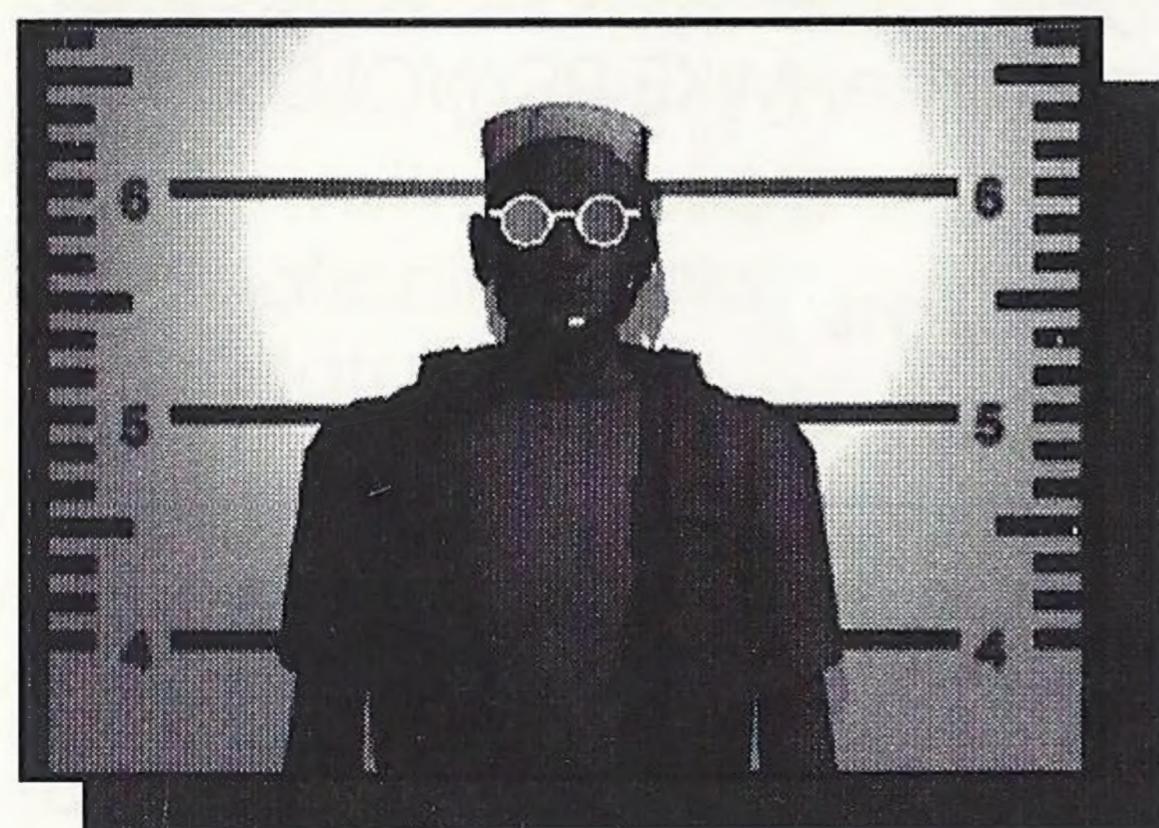

### The Man

Real name: RESTRICTED

Rank: COLONEL

Age: 27yrs

The leader of Da Wardenz.

### Earshot

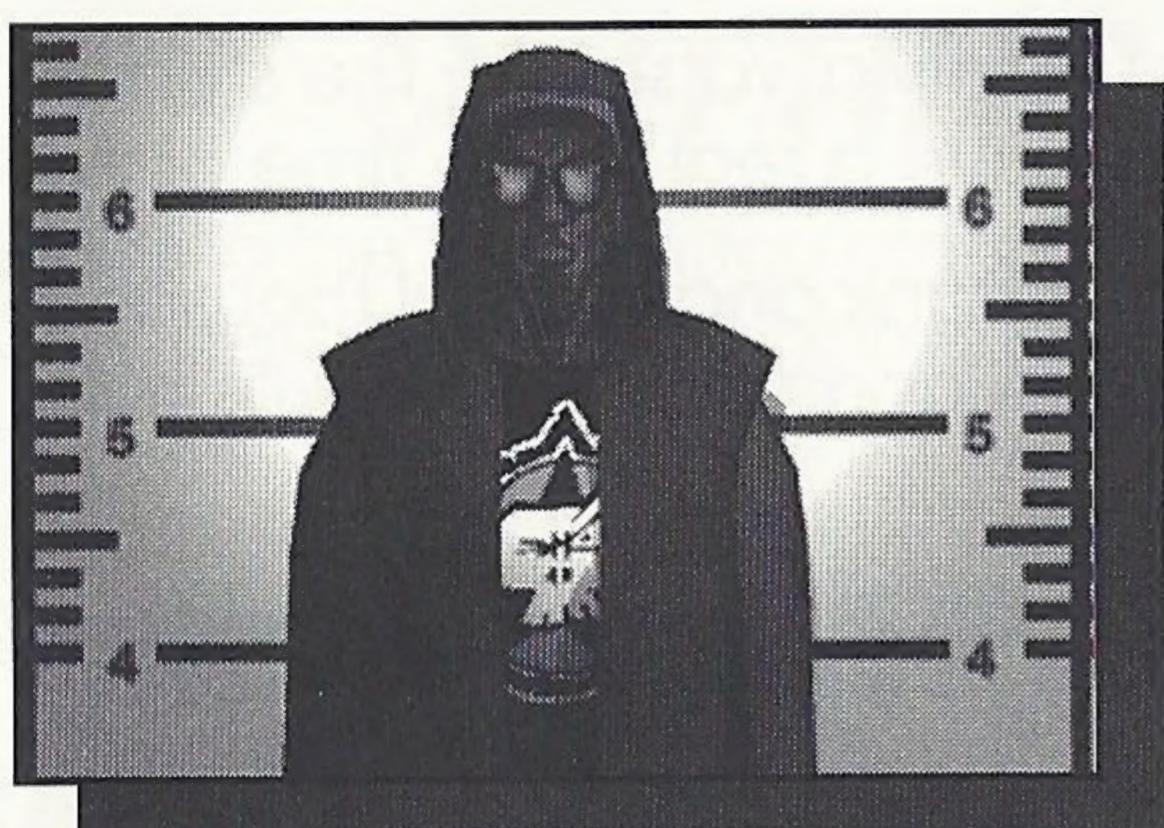

Real name: DARNELL JONES

Rank: SERGEANT

Age: 31yrs

Earshot is in charge of Communications and Tactics and will feature in-game to give you messages relating to your objectives etc. He's something of a pseudo-intellectual, so don't go asking him about the existentialism of Jean Paul Sartre, or you'll most likely wind up with a 20,000 word thesis on the subject.

# SHELLSHOCK

## D-Tour

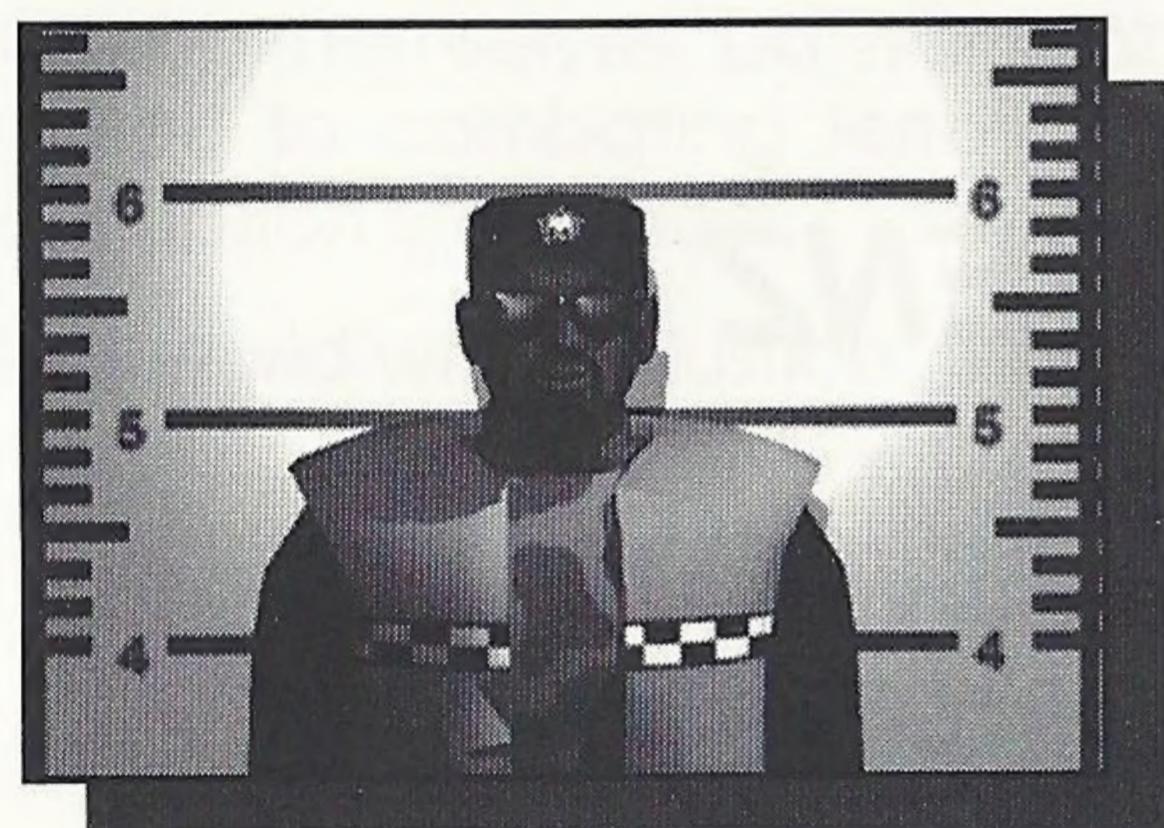

Real name: CECIL COLES

Rank: PRIVATE FIRST-CLASS

Age: 29yrs

A onetime member of the Special Forces unit that the other members of Da Wardenz were also attached to, he is an expert with armored vehicles. D-Tour is

your buddy throughout the tour of duty that you serve with Da Wardenz, having been assigned to accompany you in the tank during your missions. He will feature chiefly in-game.

## Props

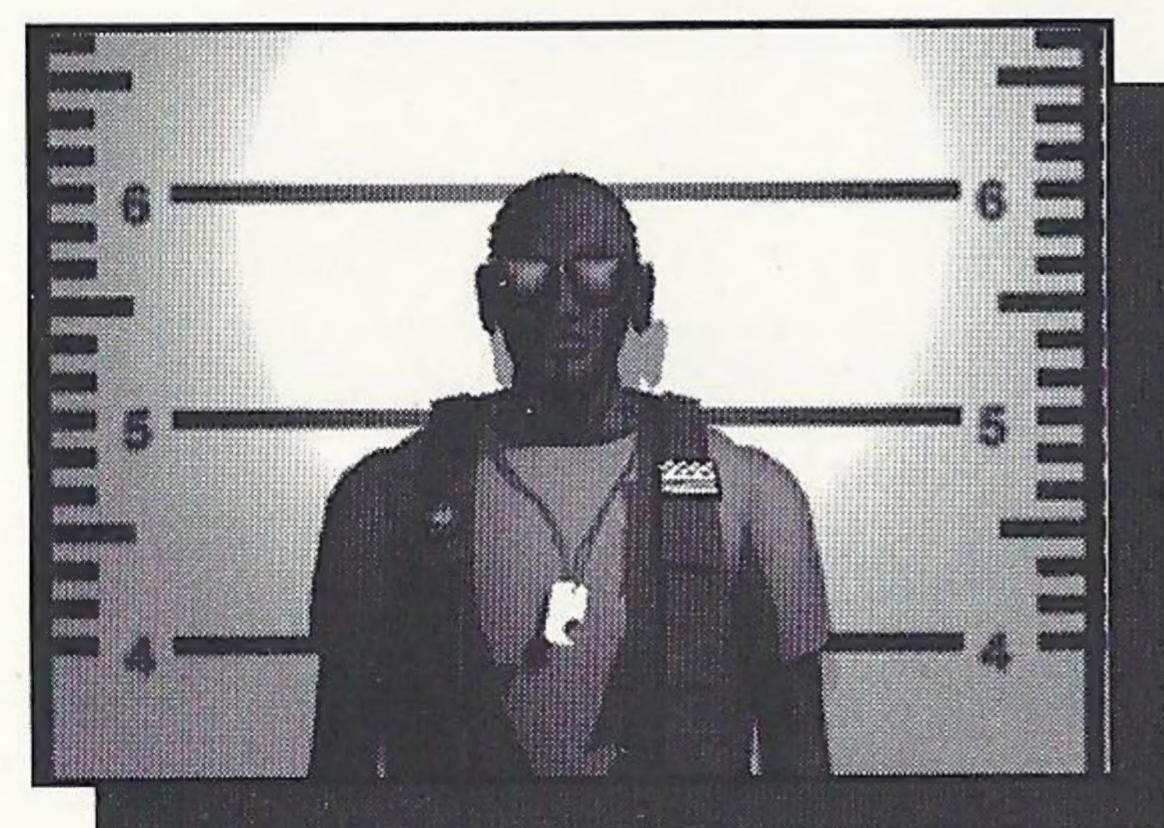

Real name: ALVIN FIELDER

Rank: CORPORAL

Age: 24yrs

Props is an ordnance and supply specialist (guns 'n' stuff). He's at home in the workshop, where he controls the supply of equipment and ammunition for your

Predator tank. Go see Props if you want to equip your tank - so long as you're within his budget.

## Dogg-Tag

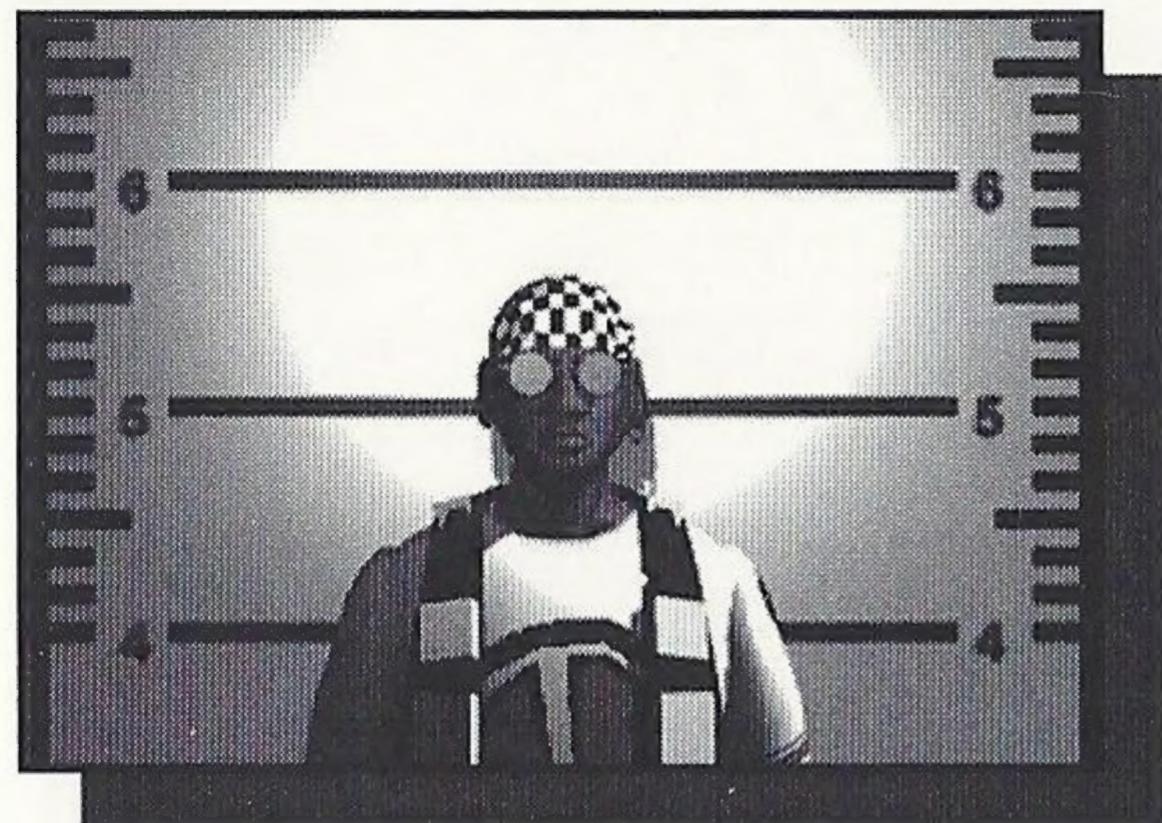

Real name: MIKE REYNOLDS

Rank: CAPTAIN

Age: 27 yrs

West Point educated and a one-time member of Special Forces, he is the leader of Da Wardenz and will brief you at the outset of each mission. Dogg Tag is the

only member of Da Wardenz to know The Man's true identity.

## 9-1-1

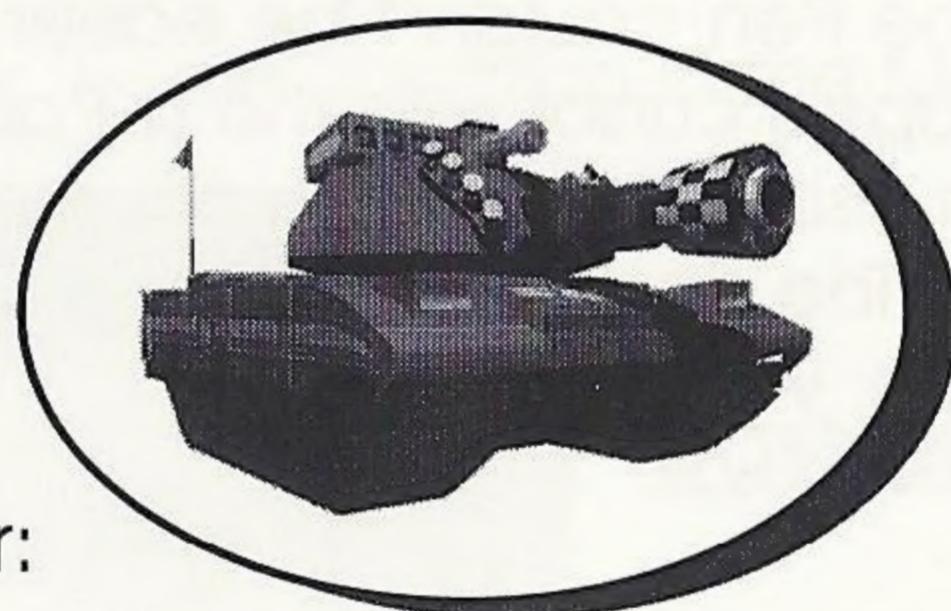

Real name: CHARLES VALDEZ

Rank: LIEUTENANT

Age: 25 yrs

Also a graduate of West Point, 9-1-1 was a onetime member of a Special Forces unit attached to the Army Air Corps. He performs the role of Da Warden'z pilot, flying both the A-10, for supporting air-cover, and the Chinook, for rescue missions. 9-1-1 is a very creative individual—he's the guy responsible for 'decorating' Da Wardenz vehicles.

## ***THE M-13 PREDATOR BATTLETANK***

The word from D-Tour:

This is what you're gonna be playing with over the next few days and months. We're talking serious state-of-the-art mobile mayhem, here. The M-13 is what you need when you're rolling out into a real bad place like Mostvia Vatska and the stuff's really flyin'.

She's got a 240mm, M257, smooth-bore main cannon, capable of firing armor-piercing shells with great accuracy. She's got a 60mm, M231 pivoting chain-gun operated by a built-in targeting CPU that automatically tracks and locks on to both airborne and ground-based targets.

Your Predator can also be equipped with a surface-to-air missile launcher, loaded with up to 4 Viper, fire-and-forget SAMs. On the defensive side, this baby's got depleted uranium armor which you can upgrade and replace before going back into those firefights we all know and love so well.

And she's all yours, green. So take care of her and she'll take care of you.

# **SHELLSHOCK**

## **STARTIN' OUT**

SHELLSHOCK starts with an animated Introduction. The Introduction is followed by the Title Screen. From the Introduction, press Start to take you to the the virtual environment of Da Wardenz HQ.—known as THE PEN.

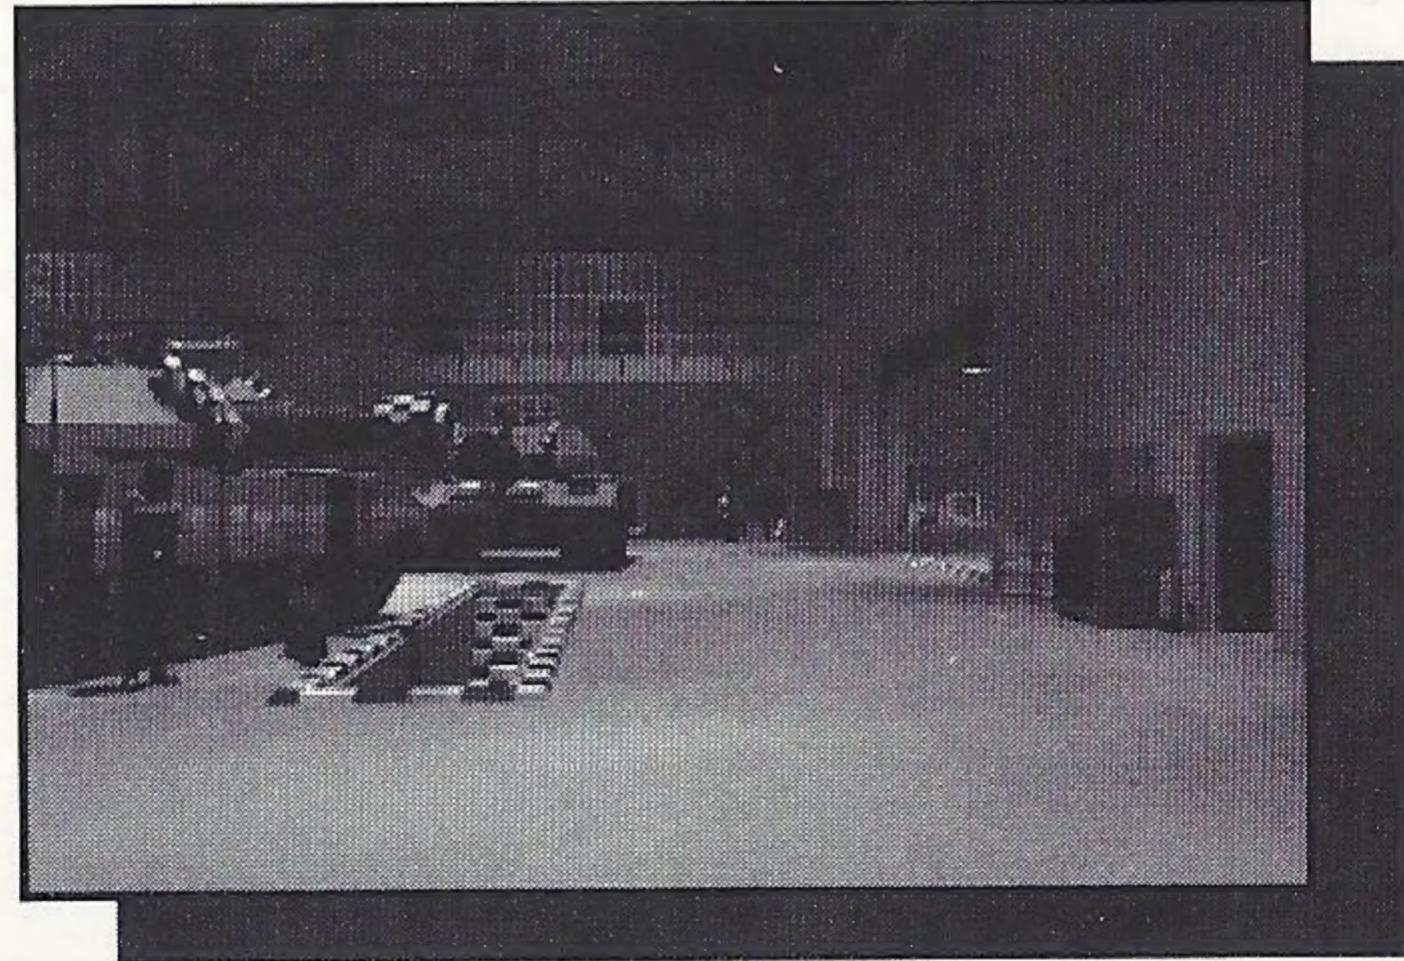

## **THE PEN**

The Pen is located in the abandoned state correctional facility on Jackson Island, New York City. It is in here that you can explore the game's various options—accessing status screens, equipping your tank and entering Mission Briefings.

## **GETTIN' ROUND THE PEN**

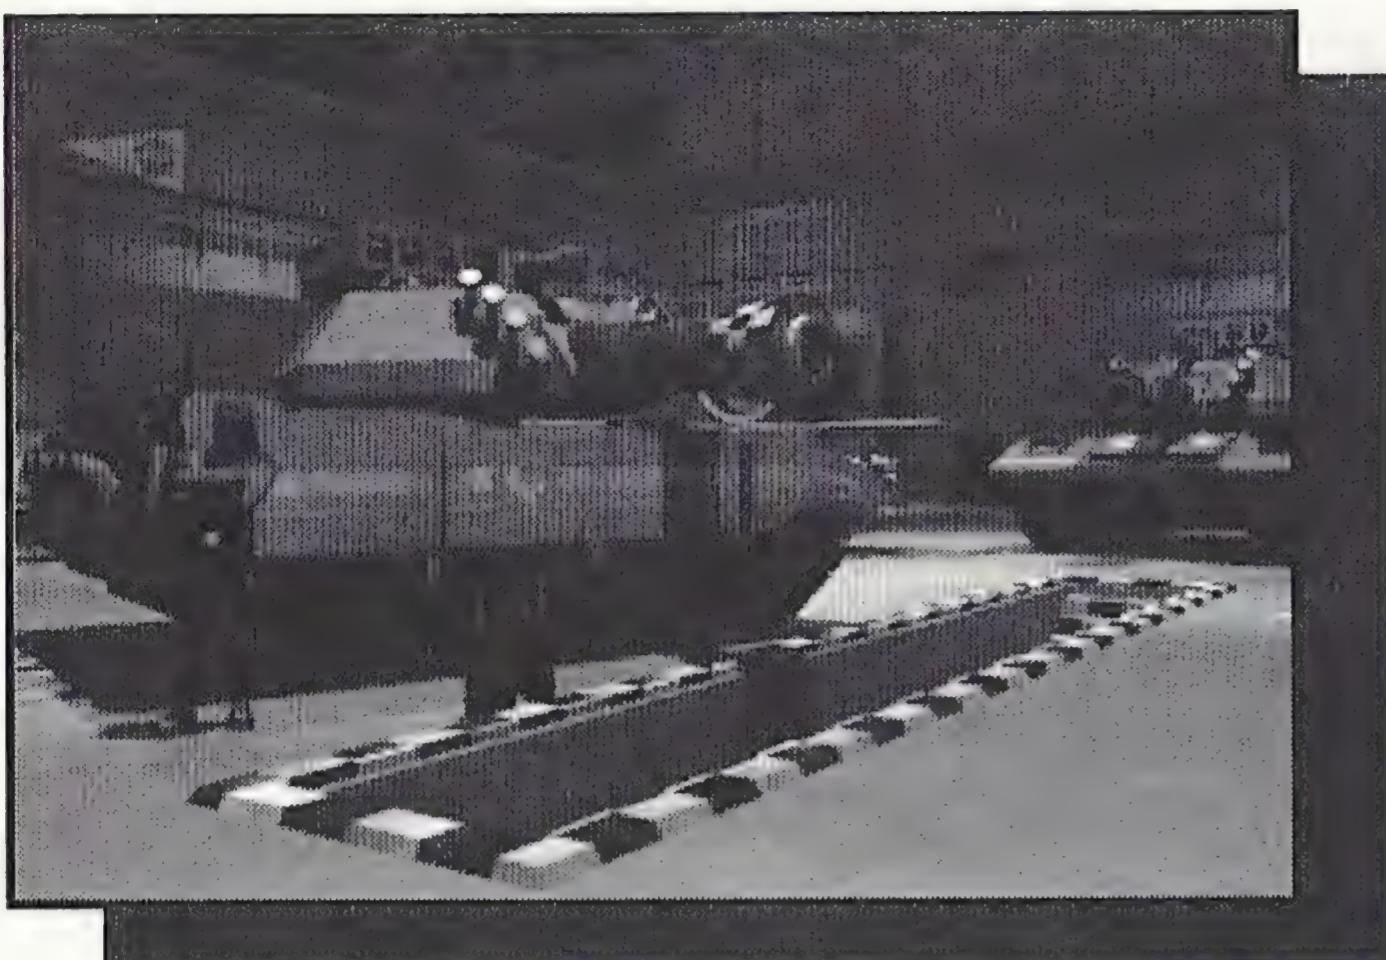

Gettin' round in the Pen couldn't be easier. All you gotta do is to move a target-shaped cursor with the D-Pad between the several locations you can visit in the HQ. Text is overlaid at the bottom of the screen to describe each location and by pressing the "C" button on that location, you can access it.

## **HQ LOCATIONS**

### **Main Hangar**

From your 'home' location in the Main Hangar, you can access 4 main locations: Tank, Basketball Court, Workshop Area and Briefing Area.

## Tank

From here, you can climb aboard your M-13 Predator tank and customize its controls. Your options here are:

### **CLIMB ABOARD TANK**

Inside the Predator's cockpit, you'll find various options to enable you to customize the tank's controls.

### **EXIT**

Takes you back to your 'home' location in the Main Hangar.

## Basketball Court

Even though you can't shoot some hoops with 9-1-1, there's plenty to do in here:

### **GO TO STEREO SYSTEM**

This is where you can listen to those funky beats.

### **ENTER SIMULATION ROOM**

Here you can talk to Earshot, your communications man.

### **EXIT**

Takes you back to your 'home' location in the Main Hangar.

# SHELLSHOCK

## Workshop Area

This is the place to check on your all-important status and to equip your tank.

### **CHECK STATUS**

Accesses the Status Computers which will provide you with the Dateline for each mission (allowing you to check your progress thru the game), Tank Status (giving you the current level of armor fitted to your tank, the amount of damage you've got, and the level to which your tank's been equipped:

Armor Level:	The amount of armor fitted, and the strength of the Armor.
SAMs:	How many missiles you have.
Engine Upgrades:	How much the engine's been upgraded (affecting acceleration, top speed and turning ability).
Track Upgrades:	How much your tracks have been upgraded (improving traction).
Reload Upgrades:	How well-tuned the reloading mechanism on the main cannon is (the time between each shot).
Targeting Upgrades:	How good your targeting computer is (speed of lock-on for chain-guns and missiles).
Cashflow:	How much cash you have.
Score:	How many points Dogg Tag's given you (or not, as the case may be).
Hit Accuracy:	How well you performed.

## TALK TO PROPS

Now you're in touch with Props in the Stores and if you got the cash, you can upgrade your tank. The upgrades appear on the counter next to Props, so you can shop 'til you drop. These are the options in the Workshop Area:

Next Item: Clicking on the D-Pad Left or Right lets you cycle through what's on offer.

Buy Item: Clicking on the "C" Button lets you buy it (so long as you got the cash).

Leave Stores: Hit Start Button.

## Briefing Area

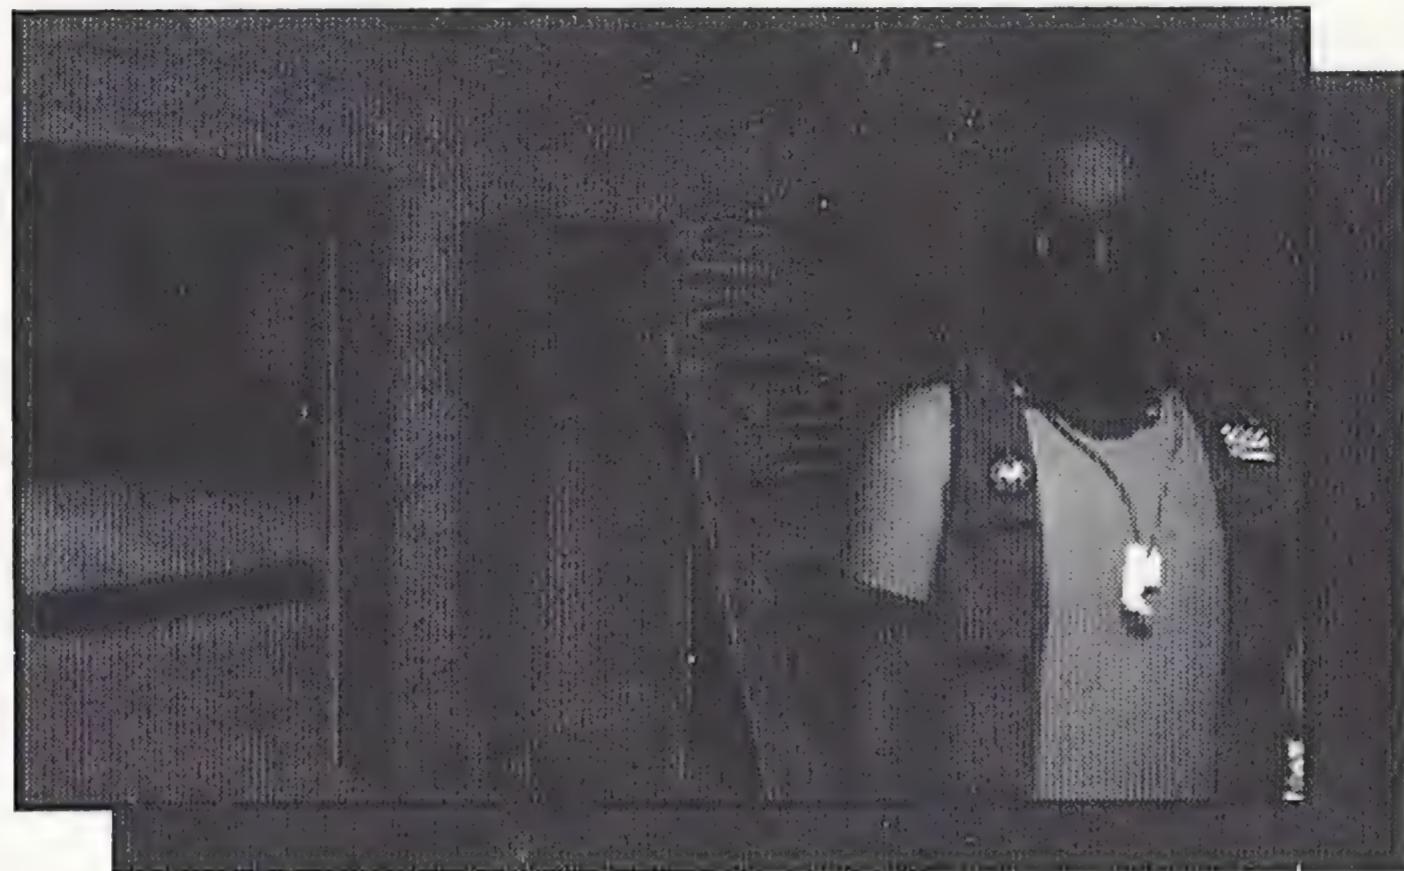

Everything from your preferred control and sound configurations to your tank status will be saved, so when you return to hangin' out with Da Wardenz crew, you'll be able to get straight down to business.

Other options in the Briefing Area are:

- **ENTER BRIEFING ROOM**  
Starts the Mission Briefing sequence for your current mission.
- **TALK TO DOGG-TAG**  
Chew the fat with the main Wardenz man.
- **EXIT**  
Takes you back to your 'home' location in the Main Hangar.
- **OPEN LOCKERS**  
Save + load your progress.

# **SHELLSHOCK**

## **MISSION BRIEFINGS**

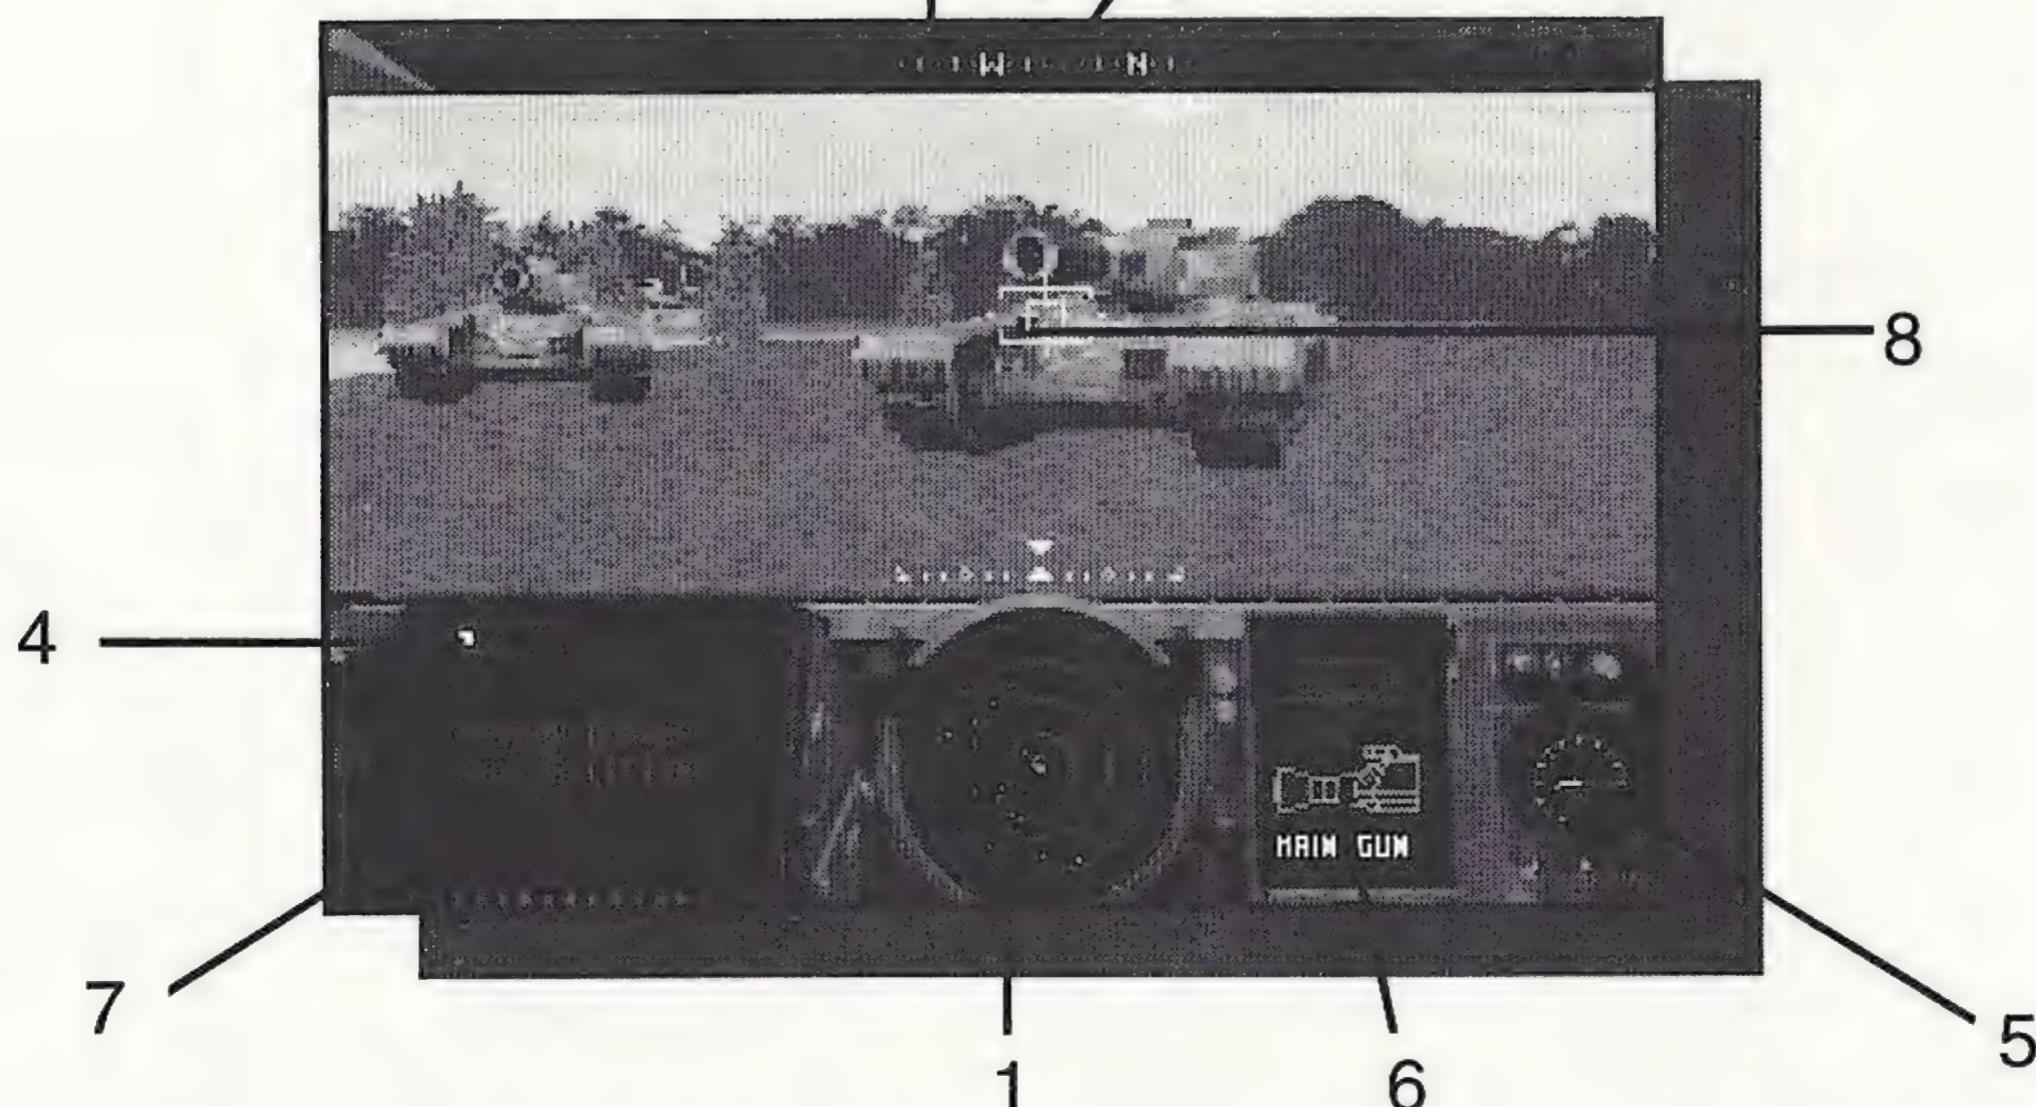

This is where you get the main rundown regarding each and every mission in the game. Dogg-Tag's the man with the plan in here and you better listen up and listen good if you want to stay alive. Sometimes The Man's talking to you and when he does, he'll be setting the scene with background details to the mission location.

Everything said in the briefings is vital to the successful completion of your missions, so you don't want to miss out on anything that's said (of course, you can always leave the briefings at any time if the call of nature's beckoning you, or you're one of those people who wants to get it on right away).

## **IN THE TANK**

The cockpit of your M-13 Predator battletank is truly state-of-the-art. In here you got everything you need to help you take out those bad guys to maximum effect:

## 1. 360-4D 'Flack' Mk.I Threat Display

This is your radar. It plots the positions of all targets, bullets, shells and missiles, relative to your position. It also shows the position of your Main Gun Turret.

## 2. Kripps 'All Points' Roll-round Compass

A roll-round compass, with the central point showing your tank's current heading.

## 3. Flarelight 470 Mission Objective Indicator

The location of your next mission objective is shown by the two arrows situated to either side of the Compass. If they are both pointing right, then you go right. If they both point left, then you should go left. If the arrows are pointing inward and a third arrow appears in the center of the screen, then your objective is dead ahead.

## 4. A1 'Protector' Armor Integrity Indicator

This indicator shows the level of damage your tank has sustained and the level of armor it's currently equipped with.

## 5. Freeway Nine-five Speed Indicator

The moving needle on this display shows how fast you're going.

## 6. Weaport A-9 Weapons/Air-support Display

This display tells you which weapon you have currently selected along with some info about that weapon. For the Main Cannon, a cannon ready indicator is shown. For the chain-gun, a barrel temperature read-out and a lock-on indicator are shown. For surface-to-air missiles (SAMs), the number remaining and a lock-on indicator are displayed. This display also indicates what type of air-support you've called in and what's happening to that air-support.

## 7. Sanya Model 4 Multi-functional Display Monitor

This is where the rest of Da Wardenz may appear to give you various in-game messages.

## 8. Targeting Crosshair

### Mercado I-12 Tactical Map Display

This is accessed by pushing the Display Tactical Map control. With the Tactical Map, you get a detailed lowdown on your current mission area.

# HELLSHOCK

## ARMOR

Your Predator tank is fitted with highly effective, depleted uranium armor, capable of withstanding multiple hits from the bad guys' chain-guns and tank shells. The status of your tank's armor is always represented on-screen like this:

In the diagram above, each segment represents the amount of damage 2 shell hits from an enemy tank shell will cause to your tank's armor—each segment therefore representing 1 Armor Unit.

At the start of the game, your Predator is equipped with 3 Armor Units. During the game you can further equip your tank by buying a further 3 Armor Units.

## WEAPONS

Your M-13 Predator battletank can be armed with 4 different weapons. However, only the Main Cannon and Chain-gun are available at the start of the game. To switch your weapon, use the "B" button.

### 240mm M257 Main Cannon

This is your big gun. Use it to take out ground targets. Aim the center-screen HUD (Heads Up Display) at the target and open fire. The Main Cannon has an unlimited supply of shells so you can blaze away without a care.

## 60mm M231 Chain-gun

This is your not-so-big gun. Use it to take out both air and ground targets. The Chain-gun locks on automatically to the nearest target and will remain locked on to it until it goes out of your direct line of sight or is destroyed. The Chain-gun takes a short while to lock-on, as its sight tracks across the screen to line up with the targeting crosshair (this is because it takes a little while for the gun to rotate into position). Once both sight and crosshair are overlaid, a lock-on will flash and the gun will remain trained on the target.

## Milipps Systems 'Viper' Surface-to-air Missiles (SAMs)

These are limited in number, must be bought from the Stores and only 4 may be fitted to your tank at any one time. SAMs can only be used against threats from the air and require a lock-on before they can be fired. Once a lock-on has been achieved (in the same way as the Chain-gun) and the missile fired, it will home in on the target until that target has been destroyed - providing that the target is within range of your radar Threat Display.

# TANK UPGRADES

A Note from Props:

If you wanna be a winner you gotta spend those dollars—speculate to accumulate. During the course of your stay with us, you're gonna be wanting to upgrade your tank's performance and you can do that by buying any of the following from my good self at the Stores.

# SHELLSHOCK

## Armor Repair

This repairs your tank's armor by 1 Armor Unit.

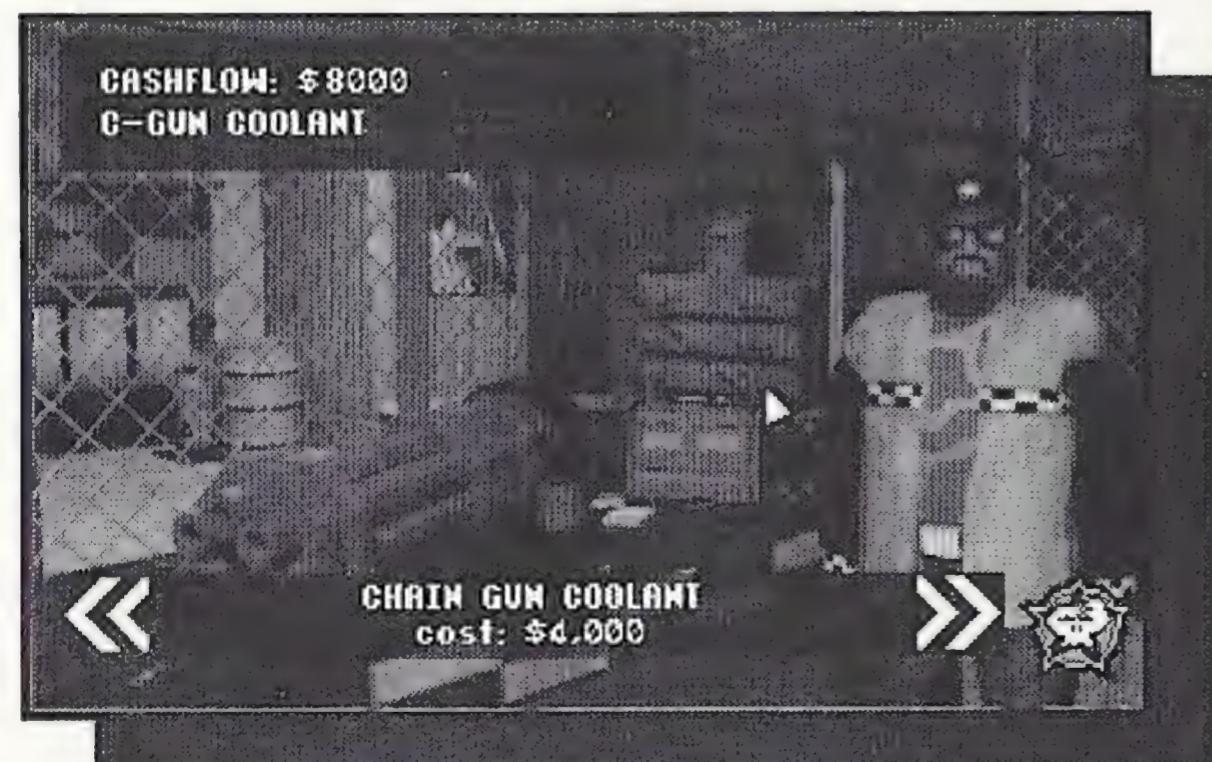

## Extra Armor

This adds a new piece of armor—equivalent to 1 Armor Unit—to your Predator battletank. Because this is a brand spanking new piece of high-grade, depleted uranium armor, the current armor strength of your tank will also go up by 1 Armor Unit.

## SAMs

You can buy up to 4 of these. None are fitted to your tank at the start of the game.

## Chain Gun Coolant

This will upgrade the speed at which your Chain Gun is reloaded.

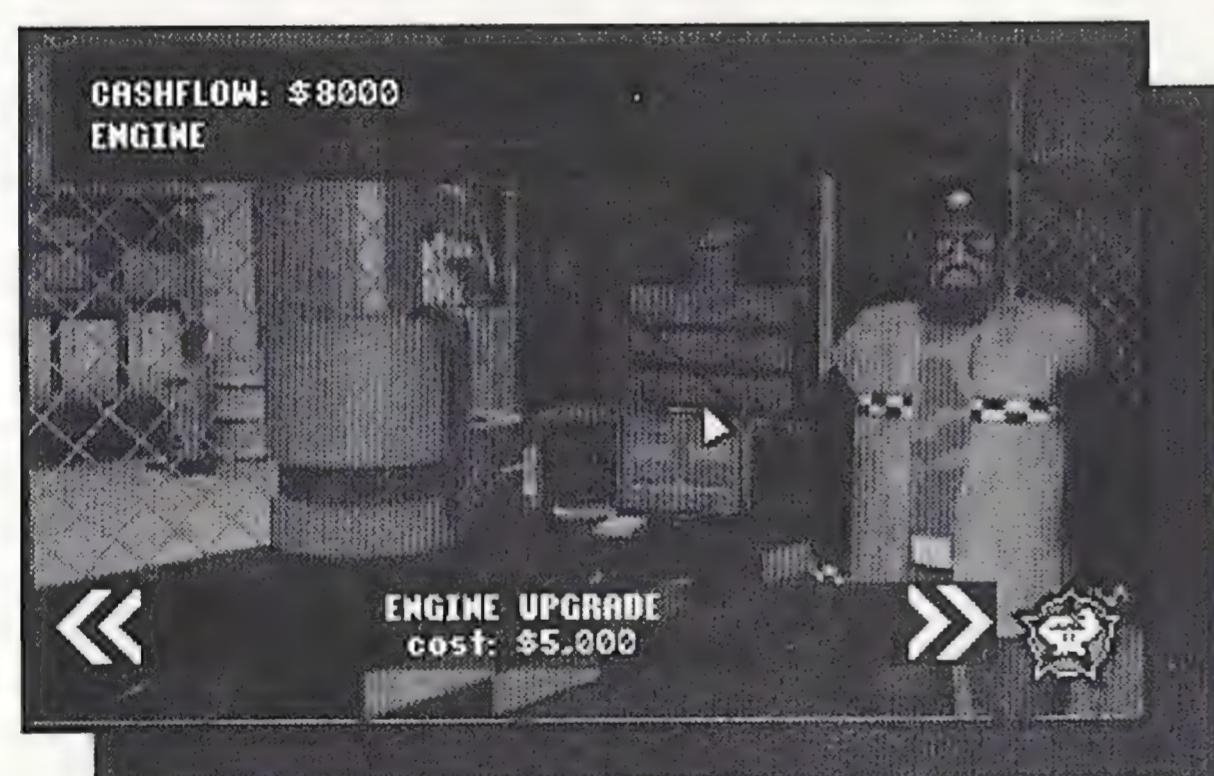

## Reload Mechanism Upgrade

This will slightly improve the speed of reloading your tank's main cannon, therefore increasing your rate of fire. My advice to you is to purchase several of these to achieve maximum performance.

## Targeting Computer Upgrade

This will upgrade your Predator's targeting CPU so's you can achieve a lock-on with both chain-gun and SAMs a lot faster. Once again, my advice is to buy several of these to achieve maximum effect.

## Engine Upgrade

Buying an Engine Upgrade will increase your tank's acceleration, top speed and the speed of rotation (maneuverability). Buy a whole bunch—but make sure you also got Tracks Upgrades too. There's no point having great acceleration unless you have the traction to use it.

## Tracks Upgrade

This upgrade improves the traction of your Predator's tracks, enabling them to get a much better grip on surfaces. The down side of this is that you may find your tank's top speed adversely affected. Buy several for maximum traction.

# SHELLSHOCK

## Offensive Air Support

Fuelling up the Nine's A-10 is an expensive operation—and when you add the ordnance on top of that, we're talking serious money here. But you're gonna wish you had that flyboy helping you out at the earliest opportunity, so start saving now. Nine does a single run per mission. No more. No less.

## AIR SUPPORT

A note from 9-1-1:

They call me 9-1-1—you gotta problem?—Just call on Nine.

## Offensive Air Support

This is basically your fourth main weapon, acting like a big smart bomb. When you call me in, you'll hear me before you see me. Then it's bye-bye to the bad guys.

# HOSTAGES

A note from Earshot:

Listen up and listen good. This is the lowdown on hostage rescue.

When you drive your tank to within a certain range of a hostage, they'll run toward you and subsequently climb aboard—but only if you're stationary. Don't move, or you might squish 'em!

If the hostage is moving too far away from cover, i.e., if you're driving away from him, then he's going to be turning back and getting out of the line of fire, back to his original hidey-hole. He's gonna wait there until you return to fetch him.

# ENEMY VEHICLES

All enemy vehicles have recognizable profiles. Learn to distinguish a basic tank from a heavy battletank.

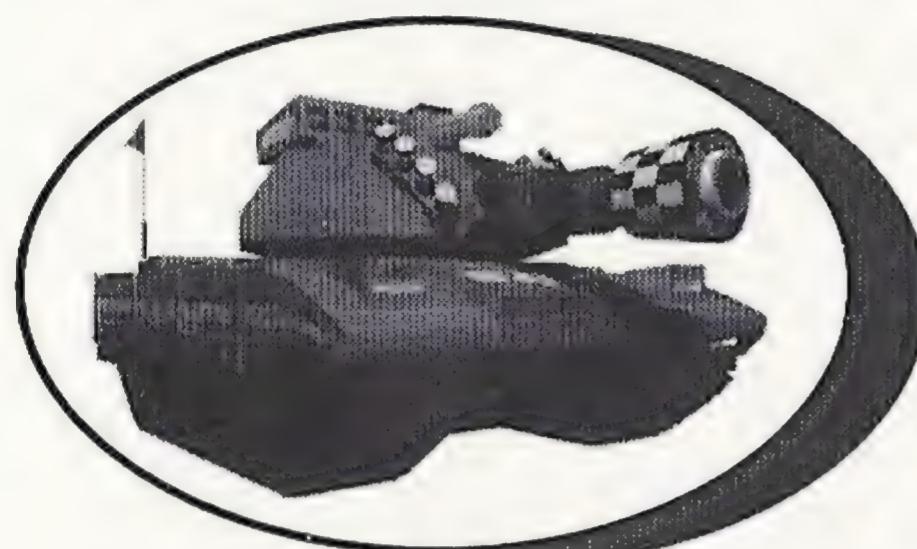

## Stationary Ground Threats

### GUN EMPLACEMENTS

Small enclosures with a chain-gun fixed into a set position, but with a 90 degree arc of fire. Use your Chain Gun to take them out.

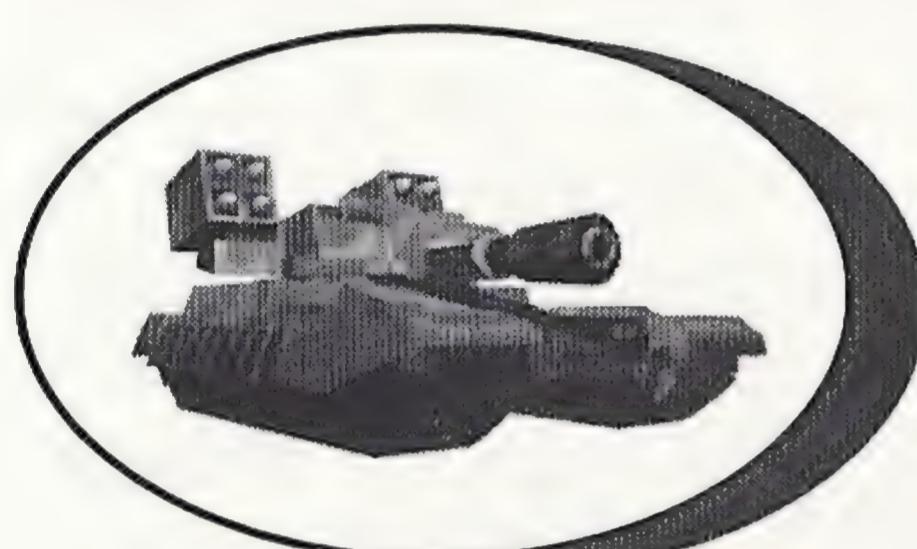

# SHELLSHOCK

## Mobile Ground Threats

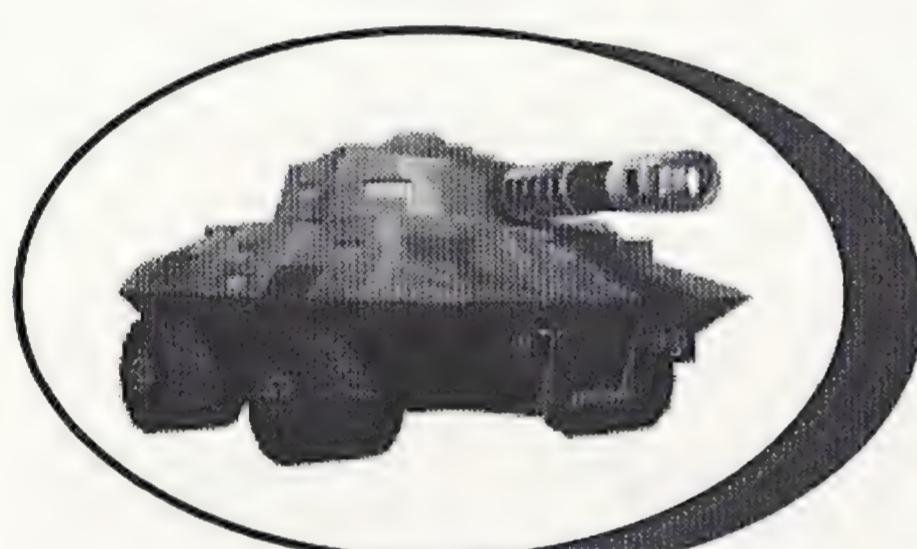

### TANKS

Same as yours. They'll hit you hard if you give 'em the chance.

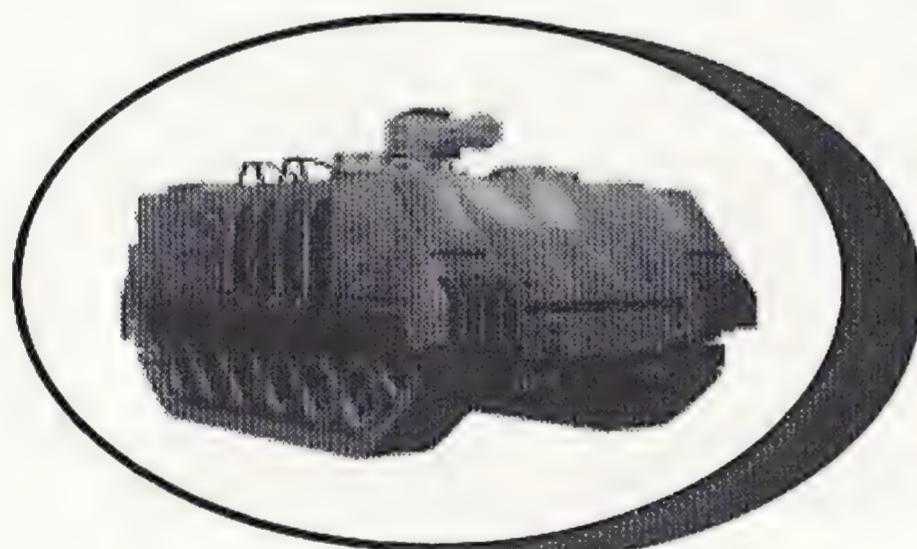

### HEAVY BATTLETANKS

These babies take more hits than their little brothers, but they aren't as fast.

### LIGHT ARMORED FIGHTING VEHICLES (AFVs)

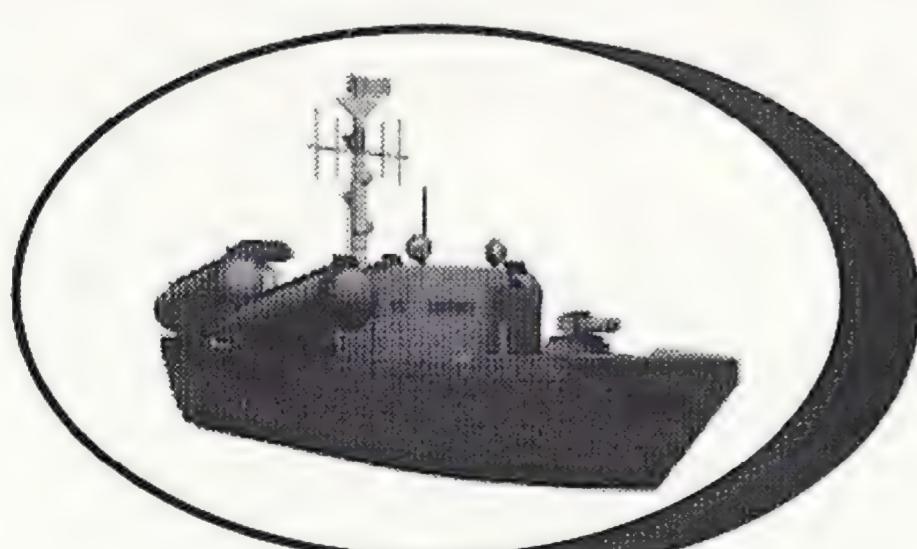

Highly maneuverable, light tanks. Small but deadly, so watch out for these guys

### ARMORED PERSONNEL CARRIERS (APCs)

Identical to the Battletank when maneuvering, the APC's armed with a chain-gun with a 90 degree arc of fire.

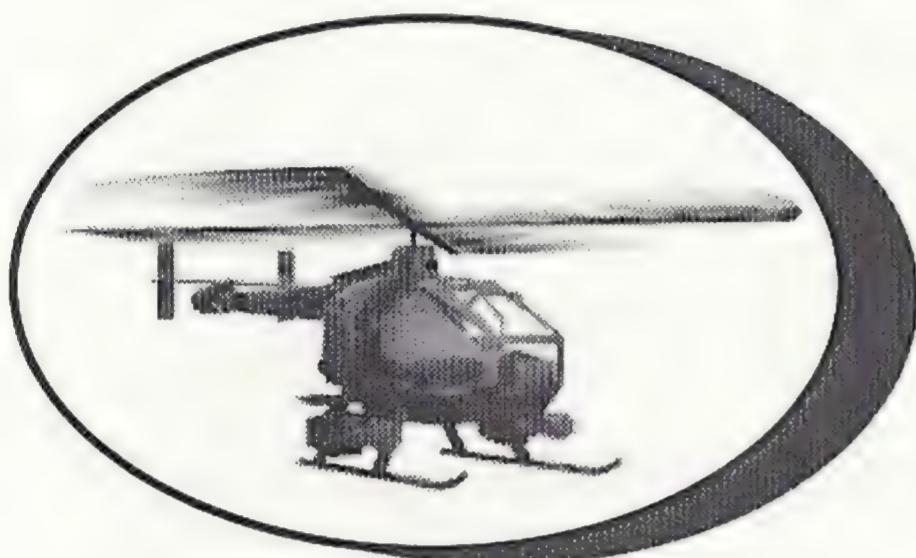

## Waterborne Threats

### GUNBOATS

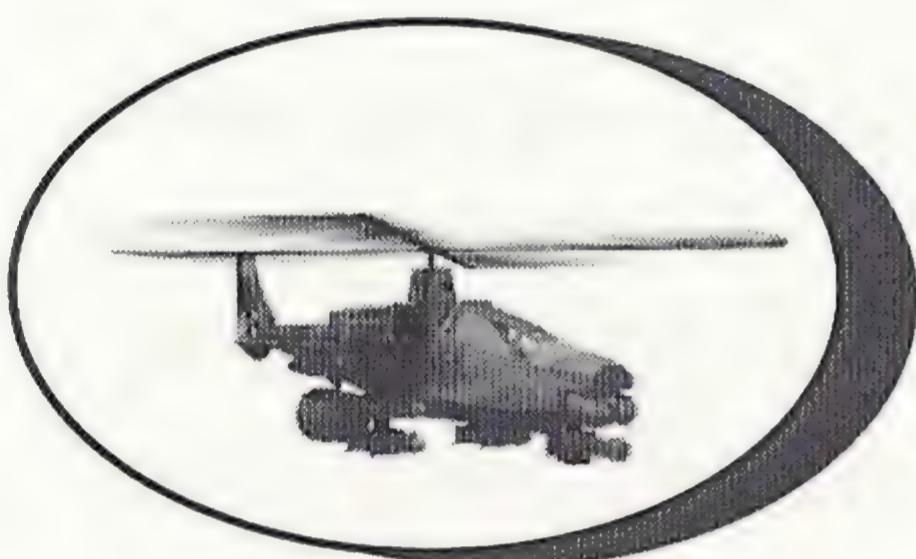

Restricted to areas of deep water, they've got a chain-gun mounted on their bows which has a 90 degree arc of fire.

## Airborne Threats

### **LIGHT ATTACK HELICOPTERS**

Armed with a chain-gun, these choppers go into a hover before opening up on you.

### **HELICOPTER GUNSHIPS**

Real bad news. Basically, a flying tank attacking you with missiles and a whole heap of other stuff that I don't even want to think about...

## **PICK-UPS**

### Supply Crates

Just drive over 'em to collect what they holding. You can cash in at the stores.

## **MISSION STATS.**

At the end of each mission, you'll be presented with a statistical breakdown of how you did. These stats will include Hit Accuracy, No. of Targets Destroyed, Mission Objectives Achieved, etc.

# SHELLSHOCK

The last word from Dogg Tag:

Someone once said, 'It doesn't matter whether you win or lose, it's how you play the game.'

Well that man was wrong.

I want you to go out there and win. At all costs...

So what are you waiting for? Let's do it...

Listen carefully to the Mission Briefings, or you'll be shooting in the dark!
